

## Urinal Waterless Cartridge

### Code

URIN118

### Description

Replacement waterless urinal cartridge.

### Features

- Water Saving
- Designed to dispense beneficial microbes and other active ingredients over a 3 month period
- Easy maintenance
- Reduces the incidence of smells and blockages
- Contents of the cartridge are designed to break down urine and prevent odors.

### Maintenance

- Cartridge should be changed every 3 months
- Urinals must be 'dosed' weekly - mix 100ml of bactericidal cleaner with 900ml of warm water. Pour the resulting 1 litre of diluted solution over and around the head of the cartridge.
- Urinals should be cleaned regularly.
- Cleaning products containing acids, strong alkalis and Bleaches must not be used as they will kill the active ingredients in the cartridge.
