

SanCeram Corian Education Wash Trough - D2

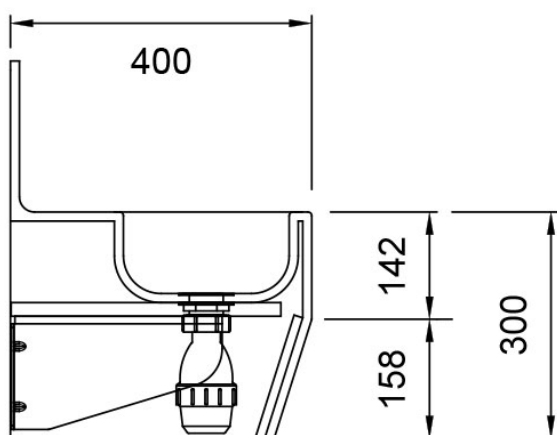

Description:

SanCeram thermoformed solid surface wash trough meets all the requirements of the Department of Education's School Output Specification for Sanitaryware.

Made from a single piece of solid surface and thermoformed into a smooth, seamless curve, it eliminates sharp edges and joints that can collect dirt, ensuring superior hygiene and ease of cleaning. In line with DfE guidelines, there are no visible fixings and the removable front access panel is manufactured from hardwearing SGL.

Features:

- Education wash trough fully compliant with DfE standards – meeting the strictest standards for hygiene and durability
- Constructed from a non-porous, waterproof Corian solid surface
- Thermoformed design with coved edges for enhanced hygiene and easy cleaning
- Integrated splash back and tap deck
- 400mm bed depth, adhering to DfE specification
- Fully concealed pipework behind a removable Solid Grade Laminate panel, which is water resistant and highly durable, with anti-tamper fixings
- Wall-mounted installation in line with DfE requirements
- Supplied in Corian Glacier White
- Fire resistant to UK BS476 Class 0
- Available in various lengths
