

T2 Solid Surface Wash Trough Data Sheet

Sloping Thermoformed Trough for Wall Mounted Taps

Solid surface material is made from natural minerals that are combined with acrylic resins, this creates a low maintenance, non-porous material with impact and thermal shock resistance. Solid surface can be thermoformed and fabricated to create wash troughs that are hygienic, tough, and durable, they also look great with a stone like appearance and feel.

Optional Support Fixing:	Wall mounted on robust steel cantilever brackets. Laminate underframe available in MFC/HPL, SGL or Solid Surface.
Maximum length:	3000mm (without joint)
Minimum length:	500mm
