As market leaders in commercial sanitaryware, we pride ourselves in delivering the very best products in terms of value and performance, with service that is second to none.

With products available for all sectors, our experienced technical experts will ensure that we offer the right solution for every environment, every time. We are competitively priced and our passion for providing the very best service is what sets us apart.

Service

With over 100 year's washroom knowledge we know how to make your life as easy as possible when it comes to ordering your sanitaryware items. We can talk you through the most suitable products for your project, ensure compliance and write bespoke specification documents. We can also provide 2D CAD Blocks, BIM, Product Data Sheets and NBS Documents. We will ensure we meet any tender return dates when providing quotations and our internal sales team are able to offer a variety of options including value engineered alternatives when required.

Quality Products

We have partnered with hand-picked manufactures who share our vision for supplying the highest quality sanitaryware. We are also proud to offer our in-house brand SanCeram, which offers surprising affordability while still being compliant and stylish. The confidence in our products is reflected in the warranties that we provide.

Delivery

We offer fast and efficient delivery on all of our standard products and free delivery on all orders over £500. If required we can phase your project, delivering items to site as and when you need them.

Website

All of our products are available to buy on our easy to use, secure website, with our expert team just a click away on our LiveChat facility. All stocked items are available for speedy delivery. You can order and pay on your Trade Account and manage your account and on-site delivery addresses. You will also have access to our Technical Library where you can download and save technical documents to your personal project folders.

Armitage Shanks and Ideal Standard – Armitage Shanks are a leader in the healthcare market and their products can also be found in office washrooms as well as leisure centres, schools and hotels.

As well as being the name of their parent company, Ideal Standard is one of the leading domestic bathroom brands in the UK. They are renowned for the exceptional quality of their products and an unceasing desire to constantly push the boundaries of design and technology.

Inta – Inta’s anti-scald agenda and commitment to energy efficient products has positioned them at the forefront of bathroom innovation. They offer one of the widest and most diverse tap and shower collections on the market.

TMV – Thermostatic Mixing Valves (TMV) control water temperature by mixing hot and cold water together to ensure constant and safe water outlet temperatures, preventing scalding.

TMV3’s adhere to the NHS D08 regulatory standard, are HBN/SHTM compliant and comply with Doc M regulations. TMV3’s are suitable for use in healthcare and education sanitaryware settings as well as general commercial use. TMV2 tend to be most used in domestic environments.

HBN/SHTM

Health Building Notes (HBN) – Give ‘best practice’ guidance on the design and planning of new healthcare buildings and on the adaptation / extension of existing facilities. They provide information to support the briefing and design processes for individual projects in the NHS building programme.

In Scotland the Scottish Health Technical Memorandum (SHTM) gives comprehensive advice and guidance on the design, installation and operation of specialised building and engineering technology used in the delivery of healthcare.

KWC DVS – Formerly known as Franke Sissons and Dart Valley Systems, KWC DVS are leaders in automatic washroom technology and commercial sanitaryware. Providing one solution to some of the most demanding environments, including high security healthcare, custodial, retail, leisure, education, airports and other public and semi-public washrooms.

Methven – World renowned for creating beautifully designed, award winning showers, taps and valves since 1886. They pride themselves on spending a great deal of time and effort on research and development to improve on conventional hardware solutions. The Deva range provides a wide variety of products for both domestic and commercial applications.

Doc M

Doc M – Document M of the building regulations delivers guidance on providing access to and the use of buildings for disabled people. It helps ensure compliance for washroom facilities regardless of the nature of the building.

In conjunction with the Equality Act (updated 2010), which requires that every business providing goods or services to the public must take reasonable steps to ensure disabled people are not at a disadvantage, compared to non-disabled people when accessing all aspects of their premises, in short it gives ‘access for all’.

For further information please see page 82.

BREEAM (BRE Environmental Assessment Method) – Is the leading and most widely used environmental assessment method for buildings. It sets the standard for best practice in sustainable design and has become the go to measure used to describe a building’s environmental performance. This is a measure for a project as a whole and not individual products, but water efficiency can contribute to around 7% of the total rating.

Merlyn – The number one supplier of showering enclosures, shower trays and bath screens in the UK and Ireland, serving residential, commercial and hospitality sectors. Their meticulous attention to detail is rivalled only by their passion and commitment to flawless design and the use of the finest materials.

Tyde – Thomas Dudley and Masefield Beta have always had a reputation for delivering top quality products and value-adding solutions. Now, as TYDE, they are combining their resources to deliver high end bathroom products and quality cast iron components. All TYDE concealed WC cisterns have been fully tested to the highest standards with SanCeram WC pans.

WRAS – The Water Regulations Approval Scheme (WRAS) is an independent UK certification body for plumbing products and materials, helping businesses and consumers choose compliant products that keep water safe. A WRAS approval is an easy way to demonstrate that a material or water fitting is of a suitable quality and high standard, set out by water regulations.

Riba CPD Providers Network – Consisting of over 500 manufacturers and suppliers, training companies and advisory organisations, The RIBA CPD Providers Network provide RIBA approved CPD’s to architects and other specifiers. Our Riba approved CPD’s fit into the Legal, Regulatory and Statutory Compliance and Design, Construction and Technology Riba core curriculum topics. You can take part in our CPD’s online, or we can present to your team in person or remotely.

Our collection of sleek and modern WCs include Back to Wall, Wall Hung and Close Coupled designs, as well as hygienic Rimless options and WCs that comply with DOC M and HBN regulations.

Whatever type of WC you require, whether it's for a commercial or a school washroom, you will find a suitable design at the right price to suit your budget. To complement our range of WCs we also have a complete range of toilet seats, cisterns and flushing controls.

Wall Hung WCs

Our range of Wall Hung WCs are perfect if you're looking for an ultra-modern, minimalist and space saving WC. With designs from SanCeram, Ideal Standard and Armitage Shanks, our collection of wall mounted WCs have smooth, clean lines. Hidden fixations provide a seamless finish and with features such as ergonomic design and easy clean floor space, Wall Hung WCs are a great solution where space is minimal or narrow.

Back to Wall WCs

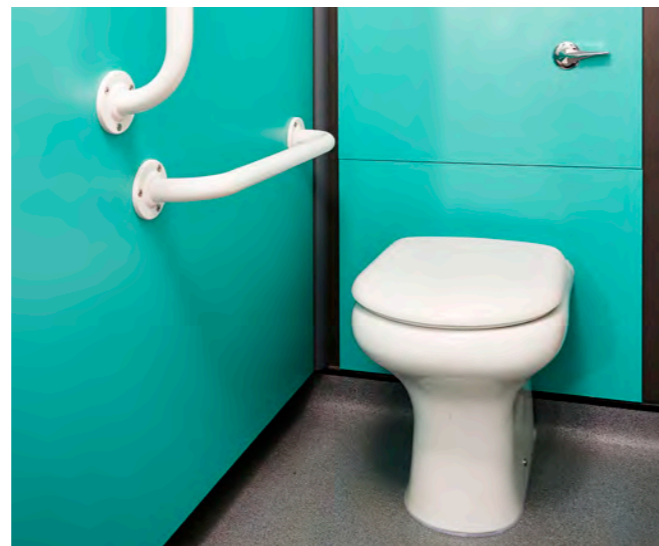

Sat on the floor, Back to Wall WCs are strong and secure, ideal for demanding environments. Our range include features such as box flushing rim and easy-clean designs. We also have Doc M compliant options for disabled and accessible toilet use.

Close Coupled WCs

Our Close Coupled WCs are brought to you by SanCeram and Armitage Shanks, offering designs that are sleek and modern with robust precision casting. All of our Close Coupled WCs have an ultra slim cistern with a 6/3ltr dual flush to promote water saving, great for when budget and space are tight.

Disabled Toilets

Our range of Disabled Toilets are Doc M compliant and perfect for wheelchair access in commercial, education, leisure and retail settings offering both raised height and extended projection. If you are looking for a full Doc M solution then our Doc M WC packs can be found on page 82.

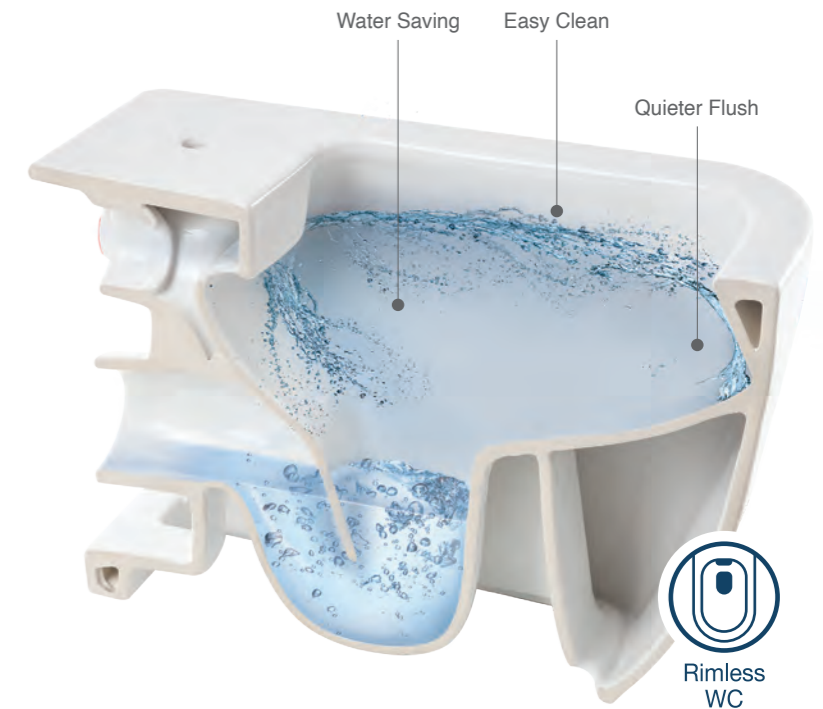

Icon key – Features of our products

We are proud to offer a wide range of Rimless WCs that set new standards in hygiene and water saving.

- ✔ **Hygienic and easy to clean:** The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic
- ✔ **Water saving:** Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third
- ✔ **Efficient design:** Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing
- ✔ **Silent flush:** Rimless technology allows a faster and more silent flush

We recommend...

Early years education

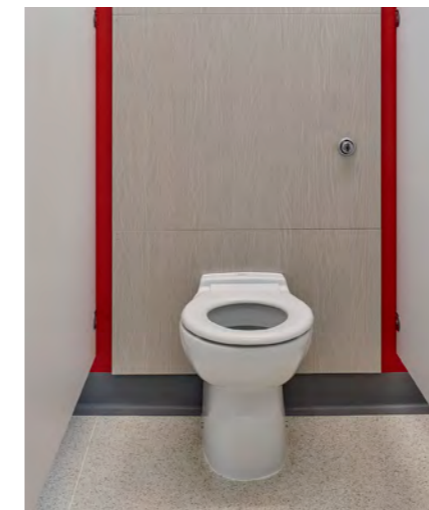

Our SanCeram Shenley Back to Wall Toilet Pan measures 350mm high from the floor to the rim making it an ideal height for early years, encouraging and supporting independent use.

We have a wide range of high quality toilet Cisterns bought to you from renowned market leading brands. Whether you need an Exposed or Concealed Cistern for your project, we can offer a stylish yet practical solution.

With a full and reduced flush, Dual Flush Cisterns are ideal when it comes to saving water and saving money. The flush capacity can be reduced to as little as 4ltr for a full flush and 2.4ltr for a half flush reducing water usage by a third. We also have a selection of Single Flush Cisterns, which when used have the benefit of ensuring the same flush capacity is used each time and not left to user selection.

Toilet Flushes

We also have a wide range of Toilet Flushes that can be used across various sectors including Healthcare and Doc M. We have Push Plates, Push Buttons and Sensor Flushes available in a selection of finishes, so no matter the project we are sure to have a suitable product. You can purchase cisterns and flushing mechanisms separately or you can purchase them together as a bundle for ease.

Sensor Operation Flushing

With hygienic touch free operation, Sensor Flushes are ideal to help stop the spread of germs and bacteria. Many have an adjustable fill delay timer, preventing flushing before the cistern is completely refilled, giving a consistent effective flush. There is also the option of mains powered or battery operation depending on the installation requirements.

Touch Operation Flushing

Our traditional Touch Operation Flushes come in the form of Lever, Button and Push Action. Many offer smooth pneumatic operation, with anti-finger trap design features for safety and ease of use, ideal for schools and public areas. We also have options to accommodate high impact, vandal resistant requirements.

Icon key – Features of our products

**The OSMO™ T1 Concealed Cistern
WRAS approved and reduced installation time...
What's not to like?**

Why choose the OSMO™ T1 Concealed Cistern

- ✓ Multiple flushing volumes for water saving: 6/4 – 5/3 – 4/2.6ltr
- ✓ Compatible with a wide range of single and dual flush push plates, buttons and sensor flushes
- ✓ Factory assembled, unique reversible cistern body due to AXIS Technology® achieving multiple outlet and inlet options without having to swap internals round on site
- ✓ Fluid category 5 cistern; the only way to achieve a water regulations compliant cistern in standard height pod shelves
- ✓ WRAS approved pneumatic flush, cable flush and inlet valve

We recommend...

Education

The anti-finger trap design and pivot action ensuring easy operation, make the Tyde Drift Pneumatic Push Plate ideal for use in education settings.

Commercial

The stylish, Tyde Wave S3 Intelligent Sensor Flush Plate in black glass provides dual flush operation for maximum water saving and hygienic touch free operation.

Best all-rounder

The Tyde OSMO™ T1 Concealed Cistern is a top access, concealed, reversible cistern with AXIS Technology creating multiple inlet options from the same unit – reducing installation time one site.

Tyde Drift Pneumatic Push Plate

Tyde Wave S3 Intelligent Sensor Flush Plate

Tyde OSMO™ T1 Concealed Cistern

- Hygienic, touch free operation
- LED flush indication
- Post flush sensor delay allows the cistern to refill fully before another flush is delivered
- Dual flush can deliver 6/4, 5/3 or 4/2.6ltr flush volumes
- Battery operated (4 x 1.5V AA batteries)

Operating Voltage

- 6V DC

Nominal Voltage

- 230V AC

Wall Thickness

- Max 45mm

Sensor Range

- Up to 50mm

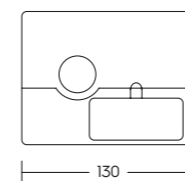

Surround Options

40mm surround in:

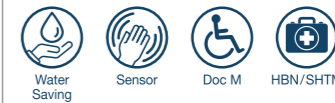

- Chrome – CIST216
- Stainless steel – CIST216SS
- Matt black – CIST216B
- 100mm surround, single flush – CIST217
- 100mm surround, dual flush – CIST218

Compatible Products

- Mains adapter (230V AC 50Hz) – CIST110

Wave S2 Stainless Steel Sensor Flush Plate
CIST221

Tyde Wave S2 stainless steel sensor flush plate with Electroflo control and sensor kit, suitable for use with the OSMO® T1 concealed cistern.

Features & Benefits

- Dual flush operation for maximum water saving
- Hygienic touch free operation
- Interactive sensor indicates full or reduced flush activation
- Vandal-resistant design
- Complete with Electroflo sensor and control box
- Can be positioned up to 250mm from the cistern

Operating Voltage

- 6V DC (transformer supplied)

Nominal Voltage

- 230V AC

Fill Delay Time

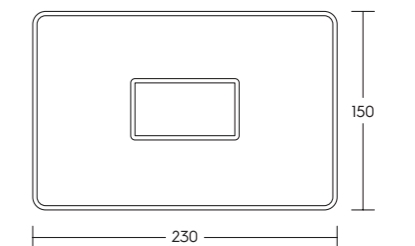

- 30 secs

Sensor Range

- Up to 50mm

Finish

- Brushed 304 stainless steel

Wave S1 Stainless Steel Sensor Flush Plate CIST222

Tyde Wave S1 stainless steel sensor flush plate with Electroflo control and sensor kit, suitable for use with the OSMO® T1 concealed cistern.

Features & Benefits

- Dual flush operation for maximum water saving
- Hygienic touch free operation
- Interactive sensor indicates full or reduced flush activation
- Vandal-resistant design
- Complete with Electroflo sensor and control box
- Can be positioned up to 250mm from the cistern

Operating Voltage

- 6V DC (transformer supplied)

We have a collection of Concealed and Exposed Trap Urinals suitable for all applications including healthcare, commercial and anti-vandal options. With distinctive, modern and easy to clean styles, our comprehensive range features concave back fascia's specifically designed to reduce splash back and waterless options for those who wish to reduce water consumption.

To complement our range of Urinals there is also a number of flushing options available for each product, including room and individual sensor solutions, plus Exposed and Concealed Cisterns. We also have a selection of fittings available including, Urinal Separators, Spreaders and Wastes.

Waterless Urinals

Our Waterless Urinals offer a modern, sleek design that are ideal for those looking to save water and money. Our specialist cartridges designed to trap odours are available to purchase in packs of up to 32, making them very cost effective.

Concealed and Exposed Cisterns

Our range of Concealed and Exposed Cisterns are available with 4.5lt and 9lt capacities, all with automatic syphons. Our Concealed Cisterns are ideal for the more design conscious washrooms and for installations where you do not want the cistern exposed to possible tampering.

Urinal Sensor Flushes

Individual Urinal Sensor Flushes offer hygienic, touch free operation. A sensor sits neatly above the urinal bowl and flushes that single bowl when the user has moved away. This offers huge water saving benefits compared to traditional urinal flushing systems.

- Delivering as little as 1 litre of water per flush, the Electroflo Individual Urinal Sensor Kit provides significant water and financial savings compared with traditional petcocks
- Automatically flushes each urinal after use, along with a built in maintenance flush ensuring the highest level of hygiene from the minimum volume of water
- No wasted water when the area is not in use
- Where multi station urinal flushing is required, the Kinetic Urinal Room Sensor Control can be used which regulates flushing based on actual washroom usage to save up to 80% of water when compared to traditional systems

Icon key – Features of our products

Individual Urinal Sensor Flushes offer maximum water saving benefits, flushing only the urinal that has been used using as little as 1ltr per flush.

We recommend...

Commercial

Flexibility:

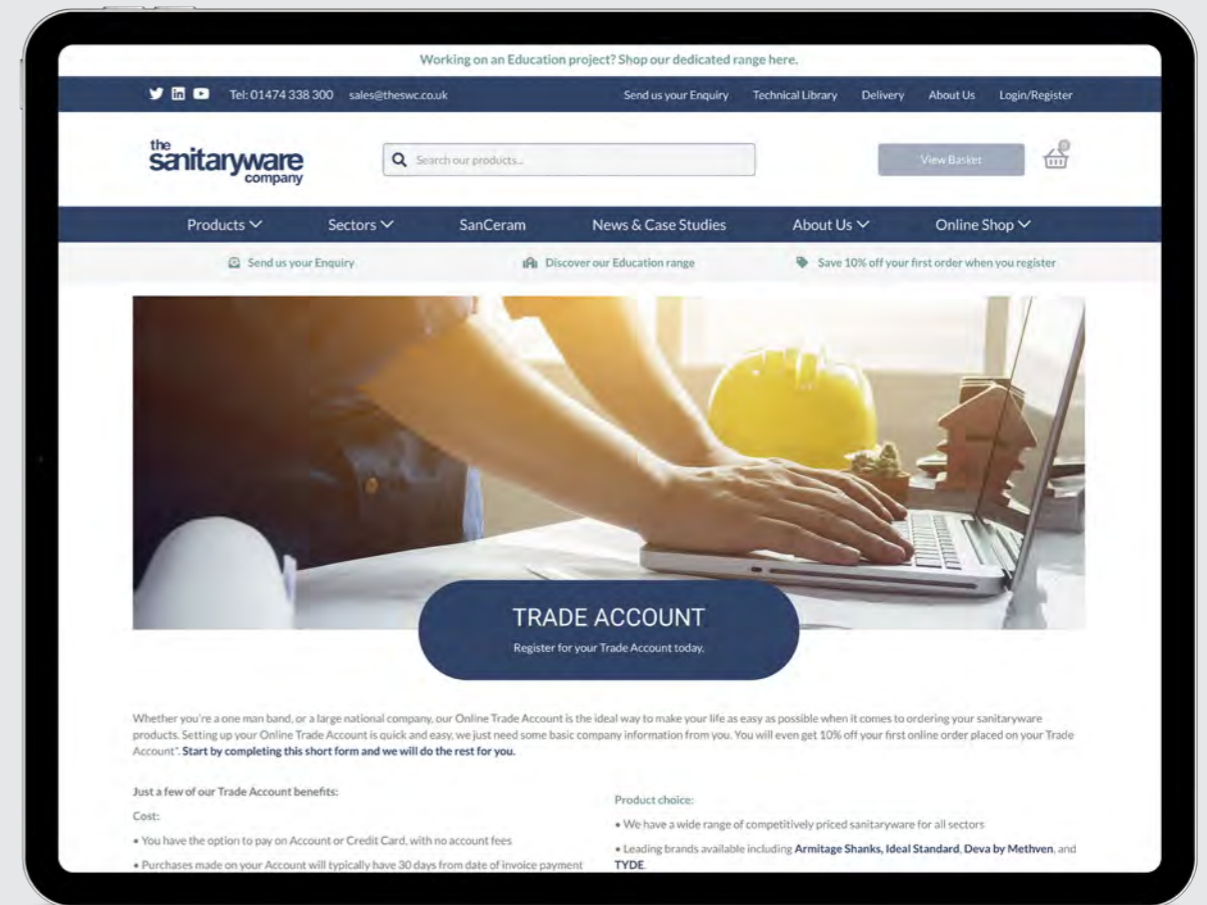

- Multiple users can be added to your account, allowing site teams to order items direct
- Manage your account online, view and pay invoices, giving you control of your finances
- When on our mailing list you will be informed about any discounts and special offers

Cost:

- Spend up to your credit limit and pay up to 30 days later (T&C's apply)
- Get offers and the best package deals with our bundle options
- Free standard delivery for orders over £500 (UK Mainland)
- Find competitive prices on market leading brands

It's quick and easy... simply click the button to set up your Online Trade Account

Our extensive range of Hand Wash Basins cover everything from practical designs for education projects right through to luxurious elegance for commercial and high end residential installations. We also have a select range of Hand Wash Basins that are HBN/SHTM compliant, suitable for healthcare projects.

Wall Hung Basins

Our varied range of Wall Hung Basins are ideal for where space is restricted. Whether you're looking for a stylish basin in a commercial washroom, HBN compliant sanitaryware for a healthcare setting or a row of small Wall Hung Wash Basins for a school washroom refurbishment, we have the perfect solution.

Semi-recessed Basins

With clean, smooth lines, all of our Semi-recessed Basin designs are perfect for today's modern washrooms. We have a variety of designs including square Semi-recessed Basins for a stunning minimalist look and ergonomic small Semi-recessed Basins for washrooms with space limitations.

Countertop Basins

Our dedicated Hand Wash Basin product range includes modern Countertop Inset Basins. There are many shapes and sizes available, including rectangular, oval and round designs, with a choice of single or two tap holes.

Under Counter Basins

Suitable for both domestic and commercial applications, our Under Counter Basins are right-on-trend and can even be installed as an inset basin into the vanity top for greater installation flexibility.

Vessel Basins

Our range of modern Vessel Basins are brought to you exclusively by SanCeram, bringing a unique look to any washroom to suit a variety of budgets. We have also have a range of tall vessel taps to complement our Vessel Basins, ideal for a contemporary bathroom or high end commercial washroom.

Solid Surface Wash Troughs

Solid Surface Wash Troughs are becoming an increasingly popular alternative to traditional Hand Wash Basins, due to their low maintenance and aesthetically pleasing nature. The hygienic smooth surface stops germs harbouring and makes them easy to clean, perfect for public spaces with a high footfall.

Our modern and durable Solid Surface Wash Troughs are the perfect addition to any commercial or education washroom. Being both stylish and timeless, they are extremely hard-wearing and will stand the test of time even in the most demanding environment.

Why choose Solid Surface Wash Troughs

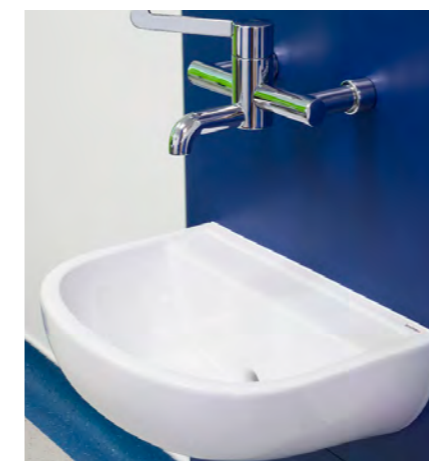

- ✔ Manufactured from an advanced composition of minerals and acrylic polymer, they are renowned for their exceptional durability
- ✔ Choice of profiles suitable for wall mounted or deck mounted taps with stainless steel cantilever brackets – compatible with our wide range of SanCeram Brassware
- ✔ Offering a larger hand washing area than basins, they help confine water to avoid excess splashing – ideal for schools and public washrooms
- ✔ Designed for multiple users, they encourage the flow of users through the washroom area
- ✔ Easily repairable – scratches can be sanded out and wiped clean

We recommend...

SanCeram

The benefits of Solid Surface

High durability

Manufactured from an advanced composition of minerals and acrylic polymer, Solid Surface is extremely durable with a high resistance to cleaning products and chemicals.

Seamless joints

The use of colour matched adhesive helps give an unbroken and flowing finish.

Hygienic and easy to clean

Meeting NSF51 standards, Solid Surface is hygienic and the smooth surface stops germs harbouring and makes the material easy to clean.

Repairable

Scratches can be sanded and polished out to keep the material looking fresh. Larger chips or deep scratches can be filled and sections can even be replaced.

Fire-resistant

Solid Surface is tested to UK BS476 Class 0.

Non-porous and waterproof

Solid Surface is non-porous and 100% waterproof, enabling its use in a wide range of applications.

Our comprehensive range of Brassware includes traditional and modern taps to suit your every requirement. Whether you need Wall Mounted Taps for a commercial environment, no touch Sensor Taps for a school washroom refurbishment or Doc M taps for a DDA compliant toilet, we are confident that we have what you need.

Our range of Brassware also includes water saving taps, HBN compliant taps and designs that have anti-vandal features. We also have a selection of Tall Basin Taps, Pairs of Taps and Kitchen Taps as well as a range of bathroom Wastes and Traps.

Lever Basin Taps

Our collection of stylish, monobloc Lever Basin Taps boast easy to use operation, making them ideal for commercial, educational and domestic use. With features such as tilt and turn temperature and flow control, adjustable directional slim stream aerators and WRAS approved options, there really is a solution for every project.

Self-closing and Sensor Taps

Our collection of Self-closing Taps are ideal for commercial sanitaryware installations as well as other high usage settings. The automatic shut off ensures no excess water wastage or accidental flooding, also suited to schools and public areas. We have a selection of DDA compliant Self-closing Taps that are suitable for closed fist operation, as well as designs that are anti-vandal for high traffic, busy washrooms.

Our Self-closing Sensor Taps deliver water without touch, perfect for washrooms where hygiene and water economy are key factors. As well as the choice of battery and mains powered operation, we also have Sensor Taps that are TMV3 and WRAS approved, as well as HBN/SHTM compliant for healthcare settings.

Wall Mounted Taps

Our collection of Wall Mounted Taps are available as mixer taps or separate hot and cold bib taps. With easy to use lever operation and features such as concealed fixing plates, tilt and turn temperature and flow control and WRAS approval, they are suitable for a wide range of environments.

Icon key – Features of our products

Sensor products are becoming increasingly popular in all washrooms, they remove the need to touch surfaces where bacteria and germs can populate.

Why choose Sensor Solutions

- ✓ Deliver water without touch, perfect for washrooms where hygiene is a key factor
- ✓ With pre-mixed water blended using a standalone TMV3 valve, the water temperature is pre-set to 41 degrees, the ideal hand washing temperature to ensure maximum user hygiene and prevent scalding, perfect for public areas and schools
- ✓ Automatic shut-off ensures that water is not wasted – saving both water and money
- ✓ Sensor taps with a pre-set temperature that is kept at a constant, use less energy than one with an adjustable temperature
- ✓ For healthcare installations you can rest assure that they offer increased infection control benefits

What better way to see our range than in some of our Case Studies

Click the button to view our full range of Case Studies online

Document M (Doc M) of the building regulations provides guidance on providing access to and the use of buildings for disabled people. It helps ensure that washroom facilities are available for all regardless of the nature of the building.

In conjunction with the Equality Act (updated 2010) which requires that every business providing goods or services to the public must take reasonable steps to ensure disabled people are not at a disadvantage compared to non-disabled people when accessing all aspects of their premises, in short it gives 'access for all'.

You will also find requirements for visual impaired users which state that a 30 point LRV difference should be allowed for between the critical surfaces, in the washroom environment, typically between the walls, floor, grab rails and sanitaryware fittings.

BS 8300-2 2018 must also be considered and gives guidance on the size, layout and fittings required in washroom facilities provided for disabled users.

Our Doc M solutions have been designed to ensure compliancy whilst providing users with a safe, practical and modern accessible washroom. All packs comprise of WCs and seats, cisterns, hand-rinse basins, mixer taps and appropriate grab rails.

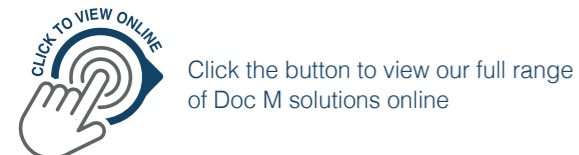

Available in left and right handing, our WC Doc M packs come in various colours and styles including those with stainless steel and chrome grab rails. From our Close Coupled WC Doc M range that is perfect for commercial accessible washrooms, through to our Sensor range that is ideal for the more luxurious project. There are also rimless flush design WCs to ensure ultimate hygiene.

Within our Doc M range we also offer compliant shower packs and a selection of grab rails. You can be assured that all components are fit for purpose, easy to maintain and fully compliant.

For further information on our Doc M range please see our Doc M Solutions brochure.

Icon key – Features of our products

Key features of a Doc M Pack

The primary characteristics of a modern washroom suitable for disabled use are shown in the example to the right. Fit for purpose is essential and sanitaryware items must be easy to operate, tailored to a specific need and correctly positioned.

- 1 Grab rails available in a range of styles and colours
- 2 Hinged support arm suitable for loads up to 120kg
- 3 Spatula style lever flush for ease of use
- 4 Dual flush cistern supplied with 4.5ltr effective flush volume
- 5 Solid stainless steel seat fixing bar for extra security
- 6 WC seats available in a range of colours
- 7 Sequential basin mixer for ease of use – TMV3 approved controlled tap to prevent scalding
- 8 Tap position to be closest to the WC
- 9 Basin without overflow to prevent bacteria build up
- 10 Basin supplied with strainer waste to allow washing under running water
- 11 WC pan designed with required extended projection and raised height to meet regulations without the need for spacer boxes
- 12 Rimless flush design to WC pans for the ultimate in hygiene
- 13 WC available as close coupled, back to wall or wall hung

We recommend...

Increased hygiene

Specifying sanitaryware for healthcare environments can be a real challenge due to the number of factors you are required to consider. You can be confident that with our SanCeram and other market leading dedicated healthcare ranges, that hygiene and infection control are top of the agenda with all HBN requirements being met.

The regulations that have a bearing on healthcare sanitaryware are HBN 00-10 part C for England and SHTM64 in Scotland, this covers guidelines for sanitaryware assemblies in healthcare environments. Taking into account area of use, infection control, ease of maintenance, health & safety and efficiency.

As well as Brassware, Basins and WCs, we also have a range of Showers, Grab Rails and Urinals, all suitable for clinical installations. So you can be assured that we have taken into account your demand for maximum hygiene and quality, whilst ensuring the products remain aesthetically pleasing.

Brassware

Our dedicated healthcare Brassware range includes the renowned Armitage Shanks Markwik 21 Healthcare Tap as well as our SanCeram option, both offering a long paddle lever for ease of use or sensor versions for complete no touch operation. Features to look out for within our Brassware collection include Anti-scald, WRAS and TMV3 approvals.

Basins

Our comprehensive range of healthcare Basins have been designed with water efficiency, maximum hygiene, quality and aesthetics in mind. Our healthcare and clinical basins are all HBN compliant, we also have special care basins for non-clinical areas of healthcare projects.

WCs

With extended projection and a high performing rimless flush design, our range of special care toilets ensure your toilet pan will perform as you expect it to. Upon request we can provide regulators specification testing results to show efficient and hygienic flushing performance of SanCeram pans when paired with our range of Tyde cisterns.

Icon key – Features of our products

Click the button to view our full range of HBN Compliant Healthcare solutions online

With a wide selection of products suitable for healthcare as well as other applications, be sure to look out for our HBN compliant products in other sections of the brochure with this icon.

There are numerous ways to minimise the risk of acquiring infections in hospitals and healthcare environments. By using our Healthcare Brassware range you can be assured that all of your HBN and SHTM obligations are met.

- ✓ Our SanCeram Healthcare TMV3 Wall Mounted Lever and Sensor Taps, both with Removable Spouts and the SanCeram Sequential TMV3 Mixer Tap are ideal to help control Legionella (HTM 04-01). With built in TMV values, the time water is at a lower temperature (when bacteria can multiply) is kept to a minimum
- ✓ These taps also have self-draining spouts, so any unused water is dispersed into the basin and not stored in the spout until the next use
- ✓ They also offer easy operation, so they can be turned on and off without contaminating hands e.g. sensor for no-touch or long levers for elbow operation

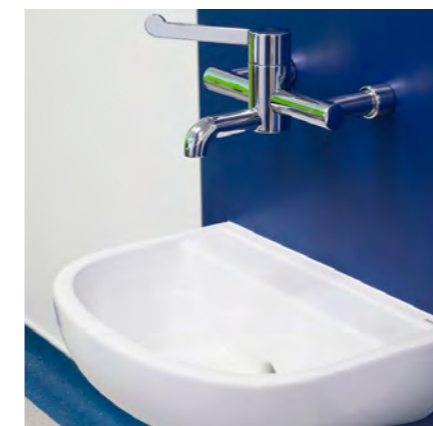

We recommend...

Our Shower range includes Concealed and Exposed installation options for Shower Valves and Shower Packs. Also in the range are Kits, Rails, Heads, Trays and Enclosures. We have solutions for every environment including leisure, education, healthcare, commercial and residential.

Our range includes options that are both HBN and DDA compliant, as well as TMV and WRAS approved. With water saving features along with built in safety stop features, you can ensure your shower area is safe, compliant and environmentally friendly.

Shower Packs and Shower Kits

With the options of Concealed and Exposed Shower Valves, our complete Shower Packs contain everything needed for your shower requirements. We have features such as built in fail safe anti-scald protection and WRAS approval. Many offer quick, easy fit and forget solutions that are stylish, affordable and compliant. Our Shower Kits include packs that are TMV2 or TMV3 approved, Doc M and HBN compliant depending on your needs. With features such as water saving Eco buttons and WRAS approval, we have Shower Kits to suit your every requirement.

Shower Valves

Depending on your installation needs we offer Concealed or Exposed Shower Valves, along with options which are Doc M and HBN compliant. Suitable for a wide variety of applications, we have options with pre-set temperature hot stops to prevent scalding and water saving features for WRAS approval and BREEAM credits.

Shower Heads

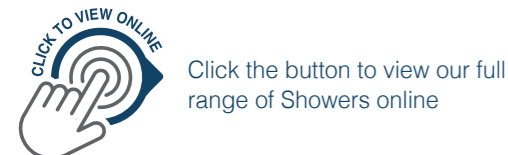

Our range of Shower Heads cover everything from Anti-ligature options to contemporary and modern designs. Features to look out for include easy DIY installation and WRAS approval.

Show Trays and Enclosures

Our selection of Shower Trays and Enclosures from SanCeram and Merlyn will complete any shower area whether it be for commercial, leisure or domestic use. Available in various styles and sizes, with features including toughened glass and Aquaglean for easy cleaning, our Shower Enclosures offer style as well as substance.

Icon key – Features of our products

The Slip Resistant Pendulum Test
Preferred assessment method of the Health & Safety Executive

Test method subject of British Standard BS 7976: Parts 1-3, 2002.2

Barefoot Wet Condition Test
The tester swings an imitation heel (using a standardised rubber soling sample) over a set area in a controlled manner.

MERLYN reached an SRV (Slip Resistance Value) in wet conditions greater than the required 36 mark. This ranks MERYLN in a premium class.

For school changing rooms and leisure facilities, the Inta I-Sport Compact Shower Panel is the ideal solution.

Designed for high use washrooms, the timed flow control automatically closes off the water ensuring it is not left running, saving water and safeguarding against accidental flooding. The shower panel's sleek and durable design will perform reliably time after time.

- ✓ All-in-one compact, lightweight design
- ✓ Top or back inlet connection
- ✓ 8 litres per minute flow regulator
- ✓ Directional control of the shower head
- ✓ Pneumatic time flow control
- ✓ Anti limescale rub-clean head
- ✓ WRAS approved

COMMERCIAL

Wide range of sanitaryware for commercial projects

A fully comprehensive range of Commercial sanitaryware offers the perfect solution for high-traffic washrooms where style and quality are of equal importance.

The aesthetics of an item may be a key consideration for commercial projects depending on the areas. For example a high end office project may consider this the most important factor in the decision on Sanitaryware
